Abstract (en)
[origin: WO2010047729A1] An electronic visual display system with an integrated general lighting system including an electronic visual display having a housing and one or more lighting devices integrated therewith to provide light to one or more spaces external to the electronic visual display housing. The lighting devices have an independent on and off state which allows for the lighting devices to be in the on state independent of the on and off state of the electronic visual display. The lighting devices provide a relatively constant and user selectable color and level of light output.
