Abstract (en)
[origin: WO2009124912A1] The invention relates to a refrigeration device (1) comprising an external housing (2), at least one refrigeration compartment (3) for storing refrigerated goods (5), and a cooling circuit (6) comprising an evaporator (4) for cooling the refrigerated compartment (3), wherein the evaporator (4) comprises a first evaporator section (7) and a second evaporator section (8), wherein the first evaporator section (7) is disposed outside of the refrigeration compartment (3) and wherein the second evaporator section (8) is disposed inside the refrigeration compartment (3), characterized by an especially good efficiency and a high cooling and freezing capacity.
