Abstract (en)

[origin: WO2009129620A1] A system for the play of digital content in a public establishment includes a digital content play system, a web accessible digital content server, a media center connected to the digital content play system and in communication with the digital content server to receive digital content, and independent web enabled or text messaging enabled devices of users. These independent web enabled or text messaging enabled devices allow a user to access the digital content server and select digital content for play on the in- house digital content play system.
