Abstract (en)

[origin: WO2009124587A1] An application server (3) is receiving a request for a service associated with a user (1), requesting security parameters from a security server (2) to authenticate the user, and sending information about use of the service to the security server. The security server can send instruction to the application server relating to the information about the use of the service the application server is to report to the security server.
