Abstract (en)

[origin: EP2275000A1] The rucksack (1) has a frame part (18) including two frame elements (19, 20) running in a longitudinal direction of the rucksack. The frame elements are arranged at a distance from each other in a transverse direction. Frame regions (8, 9) include lower ends retained at a rear wall (2) at locations that are arranged at a distance from each other in the transverse direction. Upper ends of the frame elements are retained at the rear wall, and lower ends of the frame elements are retained at a power supply (4) or at the rear wall.
