Abstract (en)
[origin: EP2275213A1] The method involves performing a glossy coating stage (I) including an immersion prime coating sub stage (3), a filler coating sub stage (5), a shading-base coating sub stage (7), a glossy clear coat application sub stage (9) and a drying sub stage (11). A matt coating stage (II) including a grinding sub stage (13), a base coating application sub stage (15), an intermediate drying sub stage (17), a matt clear coat application sub stage (19) and a drying sub stage (21) is performed. A body surface is cleaned after the grinding sub stage using cleaning agent e.g. silicone remover.
