Abstract (en)

[origin: EP2275625A2] A first scaffolding frame (32) is linked to an adjacent platform supported by a secondary scaffolding frame (34). The gap between the two frames is bridged by detachable link-pieces (30, 30.1, 30.2) anchored each side at equal height. The first transverse member (10) of the main scaffold has an additional floor (4) with connectors (42, 42.1) at each end to a bearing (36).
