Abstract (en)  
[origin: EP2275629A2] A window bolt comprising a bolt rod (1) and a bolt seat (2), wherein said bolt seat is designed to be arranged on a window frame and said bolt rod is able to move back and forth on said bolt seat, one end of said bolt rod being able to head out of said window frame so that it cooperates with the jack or slot of another window frame in order to establish a connection between these two window frames, wherein said bolt seat is in the form of a long strip shape, its back end has fixing means (21) for fixing to a first side of the window frame, and its front end has a toothed part (4) which is adapted to be fixed against a second side of an window frame.
