Abstract (en)

The blind has a rollable fabric (1), and an arrangement of blades (3) that run parallel to one another in a distance. Light slots (4) are provided between the blades, and sheet metal molded parts (2) are arranged for forming the arrangement of blades that are separate by the light slots. The sheet metal molded parts are connected with each other and arranged next to each other. Each blade extends over the entire sheet metal molded parts. The blades are manufactured by embossing the sheet metal molded parts. The light slots form cut-outs in the sheet metal molded parts.
