Abstract (en)  
The method involves receiving external control commands by an interface (5) of an operating device (1) for operating an illuminant (LA). Firmware of the operating device and the interface are partially programmed, by a programming device (17), using additional information that is conveyed to the interface. The programming of the firmware is executed in the standby condition of the operating device and in a phase. An independent claim is also included for an operating device for an illuminant comprising interfaces.

Abstract (de)  
Bei einem Betriebsgerät (1) für Leuchtmittel (LA), wie bspw. einem Elektronischen Vorschaltgerät (EVG) für Gasentladungslampen, welches eine Schnittstelle (5, 9) zum Empfangen externer Steuerbefehle für den Betrieb des Leuchtmittels (LA) aufweist, ist über an die Schnittstelle (5, 9) übermittelte zusätzliche Informationen eine wenigstens teilweise Programmierung der Firmware des Betriebsgeräts (1) und/oder der Schnittstelle (5, 9) ausführbar.
