Abstract (en)
[origin: WO2010008426A2] A load bearing suspension system having a belt having one or more belt attachment devices; a harness having one or more harness attachment devices, wherein the number of harness attachment devices corresponds to the number of belt attachment devices, and wherein each harness attachment device is capable of being releasably attached to a corresponding else attachment device; and an overgarment, wherein the overgarment includes one or more apertures formed therein for allowing a harness attachment device to pass therethrough such that a harness attachment device is able to pass therethrough so as to be attached to a corresponding belt attachment device.
