Abstract (en)  
[origin: GB2459852A] Shown is a cosmetic compact 1 having a lid 3 with a mirror 12, the lid hingedly connected to a base 2 and comprising an airless-type container 9 to hold liquid cosmetics, in which the container comprises an inner container 21 inside an outer container 20 so as to form an air space there between. The inner container 21 is in fluid communication with a dispensing head 23 for dispensing the liquid cosmetic and the outer container 20 comprises an air inlet valve 20a wherein at least one wall of each the inner container 21 and the outer container 20 is flexible so that in use when pressure is applied to the partially flexible wall of the outer container, the flexible wall of the inner container deforms and expels a portion of the liquid cosmetic. A latch 5 with a protrusion 7 may be hinged to the lid via a live hinge b and the protrusion is arranged so as to plug the dispensing orifice 8 of the container.
