Abstract (en)

[origin: WO2009132936A1] The invention relates to a method for controlling a filling process of a water-bearing household appliance, particularly a dishwasher (2) or washing machine, comprising at least the following steps: - opening a locking means (6) controllable by the machine for filling the water-bearing household appliance with water, - monitoring a fill sensor (4) detecting the water flowing into the water-bearing household appliance, - activating a pump (8) for delivering the water that flowed into the water-bearing household appliance until at least one signal occurs from the fill sensor (4), and - analyzing the performance characteristic of the pump (8).
