Abstract (en)
[origin: EP2105506A1] Fermentative production of polyunsaturated fatty acids (PUFAs) containing oil with altered fatty acid profile from cells of microorganisms of the phylum of Labyrinthulomycota, comprises adding complexing agent and/or flocculant to the fermentation medium. Independent claims are included for: (1) PUFAs-containing oil, obtained by the above method; and (2) a biomass, obtained by the above method.
