Abstract (en)
[origin: WO2010067210A1] The invention concerns an insulating system having a multi layer panel (A, B) on each side of a frame or on one side of a frame, wherein the said panel comprises at least one airtight material and at least one cementitious porous material (B) being the most inner layer to cavity, having a porosity from 0,80 to 0,95, and having a density from 150 to 450 kg / m3.
