Abstract (en)  
[origin: WO2009124526A1] The invention relates to a prefabricated component which comprises a stabilization device (6) and is formed by several elements (2, 3) which are arranged substantially parallel to each other, are produced from curable casting material (G) and are connected to one another by at least one connecting device (6). The stabilization device (6) is implemented by traction elements which are anchored in the casting material (G) of the disc-type elements (2, 3), which are arranged substantially parallel to each other, by means of anchoring elements (7) provided at the ends of said traction elements.
