Abstract (en)
   [origin: WO2009127464A1] The present invention relates to a lamp for a vehicle having a light source (1), a first reflector (2), and at least one light
   pane (6, 7), which are disposed so that light emitted by the light source (1) is reflected by a reflector face (3) of the first reflector (2) and forms a first
   lamp face (17) of the lamp. The lamp according to the invention is characterized in that the lamp has at least one second reflector (4), the reflector
   face (5) thereof being disposed separately from the reflector face (3) of the first reflector (2) and the second reflector being disposed so that light
   emitted by the light source (1) is reflected by the reflector face (5) of the second reflector (4) and forms a second lamp face (18) of the lamp, wherein
   said first and said second lamp faces (17, 18) are not coherent.
