Abstract (en)

[origin: WO2009124864A2] The invention relates to a refrigerating appliance, especially a household refrigerating appliance, comprising at least one door (1) having an inner wall on which at least one door tray (2) is arranged, said door tray comprising at least one bottom (3) for placing products to be refrigerated and at least one retaining frame (11) for securing the products to be cooled. The retaining frame (11) and/or the bottom (3) are arranged against at least one height-adjustable device (7) in such a way that the distance between the retaining frame (11) and the bottom (3) can be modified.
