Abstract (en)

[origin: WO2009135547A1] The invention relates to a marking device (1) comprising at least one first light source (2) for producing a mark (6) by means of a first light beam (3) on an especially planar object (5) at a distance (a) to at least one reference point (11, 16) of the marking device (1). The marking device (1) comprises means for adjusting a distance (a) of the mark (6) to a reference point (11, 16) of the marking device (1).
