Abstract (en)
[origin: EP2210644A1] The central armature has a base body (1) with multiple connections, a puncturing device for opening a print cartridge (11), and has a locking element (8) that locks the puncturing device. The base body is equipped with a reference burst point (15) at a region, which is charged directly from the dominant pressure within an extinguishing device (10). The base body is made of a glass reinforced fiber and partially aromatic polyamide.
