Abstract (en)

A foldable treadmill includes a base(1) and two posts(2) are pivotably connected to the base(1). A handle(22) is pivotably connected between the two posts(2) and includes at least one pivotal end(221) which is connected the two posts(2). A positioning unit(3) is located between the two posts(2) and includes a transverse link(31) and at least one passive link(32) which has a first end pivotably and is connected to the transverse link(31). A lever(3 3) is connected to the transverse link(31) so as to pivot the transverse link(31). At least one insertion(321) is connected to a second end of the at least one passive link(32), the pivotal end of the handle(22) having a restriction port(221a) with which the insertion(321) is disengageably inserted to restrict the handle(22) from pivoted about the insertion(321).
