Abstract (en)

[origin: EP2277642A1] The mold has an upper mold part with a forming die and a lower mold part with a feed line for exposing a work piece to fluid under high pressure. An intermediate mold part is arranged in a sandwich-like manner between the upper mold part and the lower mold part, the side of which intermediate part that is facing the upper mold part has a feed line for exposing a work piece to fluid under high pressure and the side of which intermediate part that is facing the lower mold part is provided with a forming die. An independent claim is also included for a device for producing shaped units.
