Abstract (en)  
[origin: EP2277792A1] The fastener has an upper part formed by a cap (2), which is pivotably hinged in the upper part. A spring held in the cap lies at the cap, where the fastener is formed without a lower part. A projection (24) is provided at a circumferential edge of the cap. The projection is gripped below a part of a container and partially overlaps a pivotable cover. The fastener is arranged on a slide cover or is arranged at a front-sided wall (65). The cap is provided with a recess, which is filled during closure of the cap.
