Abstract (en)

[origin: EP2278215A1] Light arrangement comprises a reflector element (10) with a first surface region (101) and a second surface region (102) arranged in such a way that a surface normal (F1) of the first surface region and the surface normal (F2) of the second surface region include an angle (W) which is more than 0[deg] . Preferred Features: The angle is less than 90[deg] and preferably more than 45[deg] . Both surface normals are orientated perpendicular to the main axis of a light source (4).
