Abstract (en)
[origin: EP2278229A2] The hood (1) has a fixing device (40) provided for fixation of illumination module (41). The fixing device has a receiving area (401), whose length is larger than breadth of the illumination module. The receiving area is provided for detachable connection of the illumination module with the fixing device, which is made of magnetic material. The receiving area serves as a retainer for the illumination module. The fixing device is designed as a rail, and the illumination module comprises a LED and a housing. The fixing device is lockable in two operating positions.
