Abstract (en)

[origin: WO2009142637A1] The present invention includes a method of making a chemical preferment composition that mixes ingredients including flour component, water, acidic chemical leavening agent, and basic chemical leavening agent, and mixes the ingredients in a manner to form a chemical preferment composition having a preferment viscosity. The present invention also includes a chemical preferment composition having a preferment viscosity and flour component, water, acidic chemical leavening agent, and basic chemical leavening agent. Chemical preferment compositions according to the present invention can be used to make dough compositions.
