Abstract (en)

[origin: WO2009140938A1] The invention relates to a device for subjecting sheet-like material to pressurized media, comprising a nozzle bar, which has on a side facing the material to be worked a multiplicity of outlet openings for a pressurized fluid medium, with a cavity being arranged inside the nozzle bar. According to the invention, it is provided that the nozzle bar (1) is formed as a continuously cast section (2) produced after a continuous casting process.
