Abstract (en)

[origin: WO2009130129A1] The invention relates to a vented dryer (1) having a drum (2) for drying damp laundry by means of warm process air, a heating appliance (3) for heating the process air in a first process air channel (4) prior to the drum (2), an inlet air channel (5) opening thereon, a second process air channel (8) after the drum (2), an outlet channel (9) exiting therefrom, and a first blower (11) in the first process air channel (4), wherein an auxiliary air channel (12) opens onto the outlet channel (9), through which auxiliary air from an environment of the vented dryer (1) can be fed. The invention further relates to a method for operating said vented dryer (1).
