Abstract (en)

[origin: WO2009122332A1] It consists in carrying out the following steps: a) taking high-precision measurements of the surface (1) to be clad; preferably by means of a telemeter moving along a fixed guide upon which it can slide and rotate b) drawing up a hand-drawn or computerised plan (10) of the entire surface (1) to be clad, based on the measurements taken; c) determining the size, shape, dimensions, orientation and position of at least each of the peripheral tiles (9a) that have to be cut; d) cutting the peripheral tiles (9a), in accordance with a certain shape and dimensions, in a place other than the premises to be clad, and equipped for carrying out said cutting; e) transporting the tiles (9,9a) to the zone to be clad; and f) final laying of the tiles (9,9a) without need to cut any of them in situ.
