Abstract (en)

[origin: WO2009127554A1] A fitting structure for fastening a decorative plate (7) to the door (2) of a household appliance (1) comprises a first fitting part (41) that is to be mounted on the door (2) in a vertically adjustable manner, and a second fitting part (40) which is to be fastened to the decorative plate (7). A blocking mechanism (50) allows the fitting parts (40, 41) to be vertically adjusted relative to one another in an inactive state while keeping the fitting parts (40, 41) vertically blocked in an active state. A stop-type gauge can be guided on the fitting parts in a vertically adjustable manner in order to simplify the vertical adjustment.
