Abstract (en)  
[origin: EP2279835A1] The tool has a frame including a base plate (7) and a head plate (8), and a punch stamp connected with the head plate. A cutting plate (18) is provided in or arranged on the base plate, where mobility is provided between the punch stamp and the cutting plate in a transverse direction. The transverse direction is transversely oriented to a punch stroke direction (9). A stamp guide device is active between the cutting plate and the stamp. The stamp guide device is arranged at a distance from the punch stamp in a direction transverse to a workpiece transport direction (4).
