Abstract (en)

The template (10) has a base body designed in a U-shape and arranged in an insulating board. The base body has a U-side piece (18) that lies on a side of the board, where the side points towards a building wall in a mounted condition of the board. Another U-side piece (22) of the base body lies on another side of the board, where the template is made from metal. The body is formed from a frame with a free area (26) that forms a rafter section, where edges (28) of the frame limiting the free area form a guide for a cutting unit of a cutting device. An independent claim is also included for a method for manufacturing rafter sections under usage of a three-dimensional template.

Abstract (de)

Die Erfindung betrifft eine dreidimensionale Schablone.
