Abstract (en)

[origin: EP2279926A1] The vehicle (1) has a built-in cupboard (2) arranged in an inner area of the vehicle for accommodating a railroad control system (4), where the control system is provided with a memory for storing information for identifying the control system. A train control manager (5) is provided for checking authorization of configuration of the control system. The control manager activates the control system based on the information and has a register.
