Abstract (en)

Disclosed herein is a method of packing binder rings (3) for binding documents. In the method, a plurality of binder rings (3) having a predetermined length is held by a fork-shaped jig (5). Thereafter, the binder rings held by the fork-shaped jig are heat-adhered to a fastening film (6), and the fork-shaped jig (5) is removed from the binder rings, thus forming a unit packing set (10). Subsequently, a plurality of unit packing sets (10) is contained in a packing box (20) in such a way as to fold the unit packing sets or stack the unit packing sets (10) on top of one another such that the binder rings (3) overlap with each other, thereby preventing the binder rings from becoming entangled with each other although a user draws the binder rings out of the packing box one by one.
