Abstract (en)

[origin: EP2279968A1] The container has an outer container i.e. outer cardboard, and a support element (20) arranged at the outer cardboard. A fixing element connected with the support element fixes bicycle frames i.e. racing bicycle frames, at the support element. Distance pieces i.e. plates (30, 32), hold the bicycle frames at a distance to inner walls. The pieces are partially connected with the support element. The support element is made of a cardboard box, and edges of the cardboard box are partially rolled to form the distance pieces. The fixing element comprises a block-shaped base body made of paper.
