Abstract (en)

[origin: EP2280139A1] The building closure (1') has a door frame anchored at a building part, and a wing frame rotatably mounted in the window frame at rotation axles. Locking elements (22, 23) provided at sides of the door frame and the wing frame are arranged in an outer chamber. The locking elements are viewed from an inner side of the building closure and provided in a direction perpendicular to a plane of a panel of the wing frame. Fitting parts are arranged in an inner chamber of a rebate chamber. The locking elements are provided beside the fitting parts.
