Abstract (en)
[origin: WO2009132813A1] The invention relates to a dish washer (100) with a movable door (1), wherein an opening mechanism and an opening driving mechanism are provided, in order to move the door (1) from a closed position into an at least partially open position. A decorative panel, which can be mounted in a visually appealing manner without a handle, shall be locatable at a pivotable door of the household dishwasher. In addition, the process of opening the door shall be simple. For this purpose, a decorative panel (4) is located at the door (1) and a sensor (9) for determining a force acting on the decorative panel (4) or a proximity sensor is provided, by means of which the driving mechanism for opening the door can be triggered.
