Abstract (en)
[origin: WO2009130045A2] The invention relates to a device for producing starting materials, combustible substances and fuels from organic substances. Said device comprises a reactor (10) that comprises a feeding device (11) for the organic substances, a discharge device (12) for the reaction products, and a device (13) for supplying reaction energy for the transformation of organic substances into the reaction products. The invention is characterised in that the reactor (10) comprises a device (14) for forming a circulating flow inside the reactor.
