Abstract (en)
[origin: WO2009132973A1] The invention relates to a door (2) for a household appliance (1), comprising an external wall (5) and an internal wall (6), between which a hollow space is located, and a connection piece (7) that is arranged between the external wall and the internal wall (6). Said door is characterized in that the connection piece (7) is fastened to the external wall (5) by means of a form-locking connection. The invention further relates to a household appliance (1), in particular a refrigerator, which is fitted with such a door (2).
