Abstract (en)

[origin: WO2009146809A1] The invention relates to a weapon system with caseless munition. In order to permit a further use of the weapon system essentially without delay on jamming, a design of the weapon system is disclosed, with a weapon barrel (1), a projectile magazine (2) with individual chambers (3, 30) and a propellant charge magazine (4) with individual chambers (5, 50), wherein in order to guarantee a firing position the projectile magazine (2) and propellant charge magazine (4), may be moved relative to the weapon barrel (1), the projectile magazine (2) having a chamber (3) located in a discharge position in which an ejector device for the projectile in the chamber (3) may be activated, whereas a further chamber (30) of the projectile magazine (2) may be loaded in said movement position for the projectile magazine (4) and the propellant charge magazine (4) has a chamber (5), located in a discharge position in which an ejector device for the propellant charge in the chamber (5) may be activated, whereas the further chamber (50) of the propellant charge magazine (4) may be loaded in said movement position of the propellant charge magazine (4).
