Abstract (en)

[origin: WO2009147311A1] The invention particularly relates to a method for process management in a collaborative service-oriented workshop for processing objects associated with data representing real data or processes, each object including a structure for storing links to other objects. After determining at least one function and at least one piece of information enabling the execution of said at least one function, an object including at least one reference to said at least one function and said at least one piece of information is created.
