Abstract (en)
[origin: EP2281938A1] The bowl (1) has a cover plate (3) flexibly connected with a base body (2). The cover plate has a connection part (21) that cooperates with a connection part (20) of the base body at a snap fit connection. An actuator (25) enables the release of the connection between the cover plate and the base body and the connection between the connection part of the cover plate and the connection part of the base body. The actuator is arranged at a left side (17) or a right side (19) of the cover plate and has structured surface.
