Abstract (en)
[origin: EP2281957A2] The arrangement has a flushing device that is operable for initiating a flushing process. A closet body (2) is arranged before a wall, where the closet body is adjustable in height by a height adjustment device that is arranged behind the closet body. An inspection opening is arranged in the wall for providing access to the height adjustment device. A covering wall (18) is arranged for covering the inspection opening. The covering wall extends below and above the closet body and is formed as multi-part. The covering wall comprises a glass plate that is installed on an assembly frame.
