Abstract (en)
[origin: EP2281980A1] The fitting (20.1) is formed from a cranked steel sheet or flat steel bar (34) with an end (21.2) pointing away from another end (21.1). An end leg (41.1) extends over a portion of width of the former end, so that a port wedge receiving and/or displacement-free space (50) is formed. The receiving and/or displacement-free space is limited by the end leg in a width direction or transverse direction (28) of the fitting and is limited by a transition leg and/or a fixing leg (27.1) in a length direction or longitudinal direction (46) of the fitting. Independent claims are also included for the following: (1) a toe board comprising a plank (2) a structure comprising a passage cover.
