Abstract (en)

The present invention ( fig.1 ) relates to a watertight connector (1) consisting of a single unit or solid block of soft plastic comprising a pre-cabled terminal block (2) with a cable for its connection (3), buried in a housing (of isolating material) (4) during the moulding of the latter, so to form a single piece or solid block of soft plastic airtight on all its perimeter sides, except for the front one, where the terminal block (2) opening is located.
