Abstract (en)
A current supply rail has a front side (7), a rear side (6) and two side surfaces (8), there being provided electric conductors (10) in longitudinal grooves (9) disposed in the side surfaces (8). The rail has at least one outlet device (2, 3) with contact means (23) which are insertable in the grooves (9) to contact with the conductors (10). The contact means (24) display ramp portions (27) which are obliquely inclined in relation to the insertion direction of the contact blades or pins of a plug, in order to be displaced thereby into contact with the conductors (10) on insertion of the plug.
