Abstract (en)

Lamp supporting device (1) comprising a supporting structure (2) which receives an electric feeding group (3) of the lamp supporter (4) connected to it. The lamp supporter (4) has a shaped profile (5) having two couples of housings (6, 7) suitable for receiving the conjugated profile of two couples of coupling means. Each couple of coupling means (8a, 8b, 9a, 9b) belongs to the connection of a lamp, such that the first couple (6a, 6b) of the housings (6a, 6b, 7a, 7b) is suitable for receiving the conjugated profile of the coupling means belonging to the connection of a first lamp and the second couple (7a, 7b) of the housings (6a, 6b, 7a, 7b) is suitable for receiving the conjugated profile of the coupling means belonging to the connection of a second lamp. The first and second lamp having different powers. (Fig. 1).
