Abstract (en)

[origin: US2011146107A1] A skate shoe includes a shoe having a sole through which runs a horizontal bore. From both sides of the horizontal bore of the sole, a half-axle is inserted with a wheel fixed at an outer end of each half-axle. The two half-axles have at least one flattened portion on their respective inner ends, which is located within the horizontal bore. The two flattened portions overlap within the bore and, in a second half of each flattened portion that is closer to the respective wheel, there is a recess. The each recess is complementary formed to a detent lug in a first half of the respective flattened portion and with the detent being able to pivot into the recess of the other half-axle.
