Abstract (en)

[origin: WO2009138513A2] The present invention relates to a method for the preparation of a mesoporous vector containing at least one organic UV filter, as well as the vector capable of being thus obtained. It also relates to a composition containing this mesoporous vector in a physiologically acceptable, and preferably a cosmetically acceptable, medium, as well as a cosmetic method for the care and/or make-up of the skin, comprising the topical application to the latter of this composition. It finally relates to the cosmetic use of this mesoporous vector for preventing or combating cutaneous photo-ageing, and for the production of a composition intended to protect the skin against the effects of UV and in particular to prevent cutaneous erythema.
