Abstract (en)

[origin: WO2009136188A1] A device (10) for arranging a securing- component, e.g. an edge protector (7) on a load. The device (10) comprises: a retaining means (40) for releasably retaining a securing-component and a means (50) for arranging the securing-component on a load at a distance from an operator. To facilitate use of the device (10) the retaining means (40) comprises an introducing portion (40b) to open the retaining means (40) under pressure applied thereto by a securing-component.
